ABOUT THE WAKISHA ELECTRICAL ENGINEERING & SALES SERVICES

INTRODUCTION

WAKISHA is an Engineering consultant company based in Nairobi, with presence in Coast and Western regions, Central and Eastern regions. WAKISHA is one of leading Engineering emphasis on Electrical Engineering works, founded in 2017. Wakisha is a premier engineering consultant company strategically headquartered in Nairobi, with a robust operational footprint extending across the Coast, Western, Central, and Eastern regions. By establishing a strong presence in these key territories, the firm seamlessly delivers specialized engineering solutions tailored to both urban and rural environments throughout Kenya. Their expansive geographical reach enables them to manage complex structural projects and provide expert technical consultancies, making them a trusted partner nationwide. Through localized expertise and a centralized hub in the capital, Wakisha effectively drives sustainable development and infrastructure growth across the diverse communities they serve.

WHY WORK WITH US

Reliability: “How do you guarantee the system won't fail?” Answer: Through rigorous testing and proven follow-through procedures.

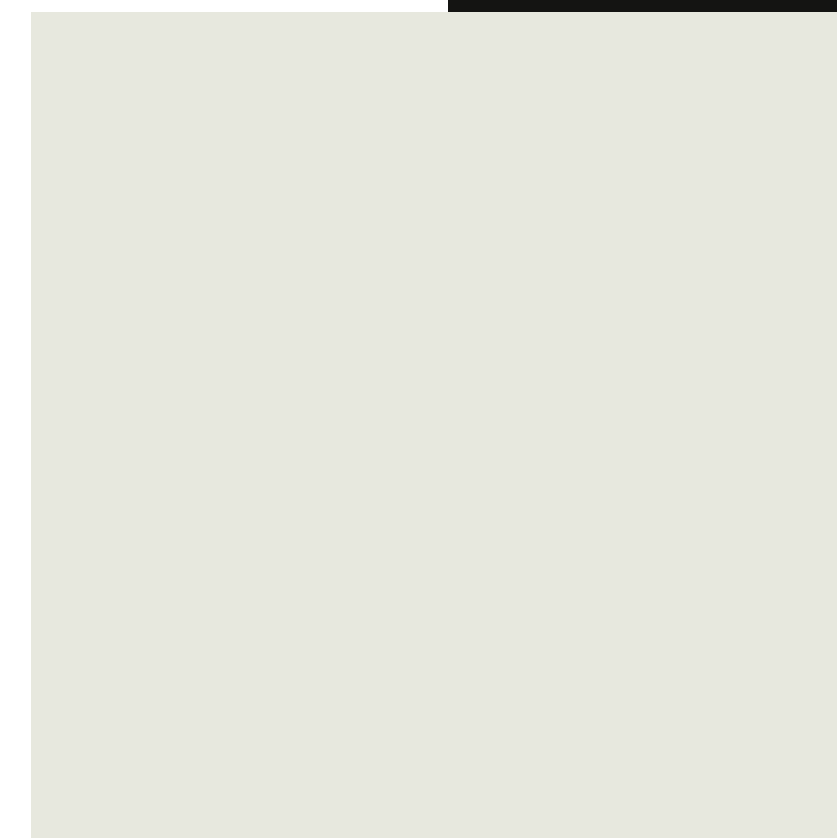

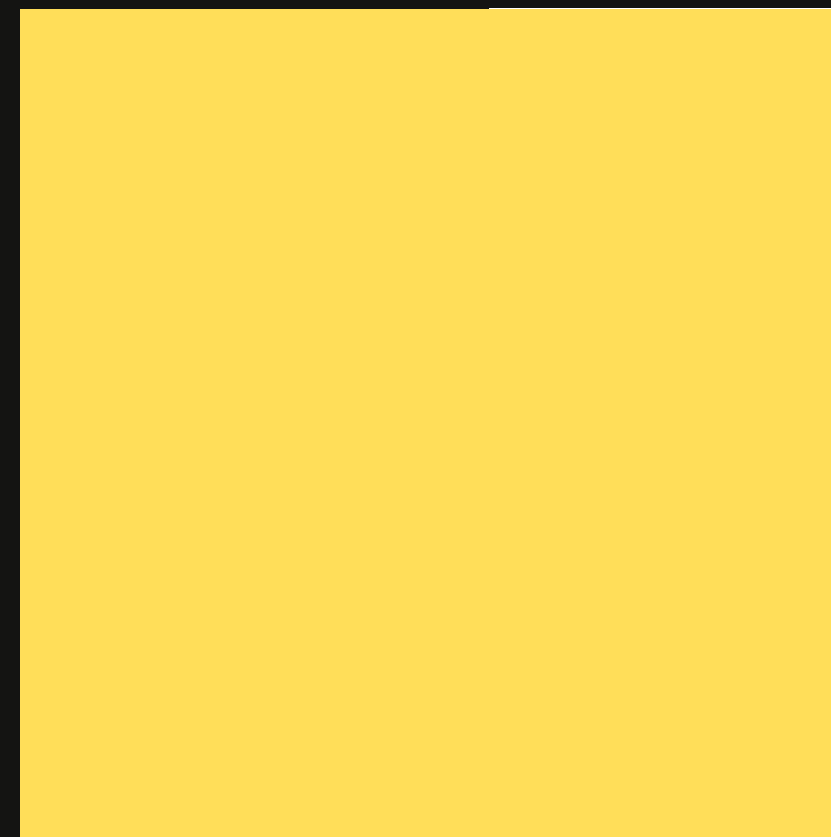

Efficiency: “Will this save or make me money?”

Answer: By optimizing circuits to eliminate signal loss and power waste.

Communication: “Will I be left in the dark?”

Answer: We operate with transparent, milestone-based communication.

Scalability: “Can this design grow with my business?” Answer: We design modular, forward-compatible system architectures.

TESTIMONIALS

"They saved our project. Their team redesigned our circuit board to eliminate signal interference, and their constant communication kept us completely assured throughout the process."

"We felt completely confident from start to finish. They explained complex technical layouts in plain English and delivered a highly efficient, reliable power system right on schedule."

"
"Highly professional and dependable. They successfully bridged the gap between our initial concepts and a fully scalable physical product while keeping our business goals the top priority."
